

Reviewing PTA Meds

The Joint Commission National Patient Safety Goals specify that critical results be communicated to the responsible

Prior to Admission medications include outpatient prescriptions and patient-reported medications.

If the patient is not being transferred from a different department within the hospital, here are the steps to Reviewing a patient's Prior to Admission Medications.

Try It Out

1. Open Patient Chart from Patient list
2. Go to the **Navigators** activity, **Admission** tab and Select **Review PTA Meds**
3. Add PTA Meds using the search field (example Tylenol)
