

## Skin Sub Documentation in the MAR

Skin Sub documentation in Epic is similar to Medication Administration in the MAR. Refer to screenshots below on how to document and charge for a Skin Sub in Epic.

### Try It Out

1. First, the order is placed
2. Next, clinicians must go to the MAR, and document an action of **Given** (*this will drop the application charge*)
3. Then charges must be dropped manually in the Charge Capture activity of the **Wound** navigator (*this will drop the product charge*)
4. Be sure to document the procedure in the **Notes** activity and all the required information about the Skin Sub such as secured/anchored with, amount wasted, etc.

The screenshot displays the Epic software interface. At the top, there are buttons for 'Manage Orders' and 'Go to Order Sets'. Below these, a search bar contains the text 'collagen'. A red box highlights the search results, which include 'COLLAGEN MATRIX FENEST (PORC) 3X3.5CM EX SHEE'. Below the search bar, there is a table with columns: Name, Type, Dose, Route, Frequency, Phase of C, Pref List, Cod, Code, and Formula. The table lists several collagen products, including 'COLLAGEN MATRIX FENEST (PORC) 3X3.5CM EX SHEE', 'COLLAGEN MATRIX MESHED (PORC) 3X3.5CM EX SHEE', 'COLLAGEN MATRIX MESHED (PORC) 3X7CM EX SHEE', 'COLLAGEN MATRIX MESHED (PORC) 5X7CM EX SHEE', 'microfibrillar collagen powder', and 'N-telopeptide, urine (COLLAGEN)'. A red box highlights the 'Accept' button at the bottom of the search results. Below the search results, there is a section for 'Collagen Matrix Fenest (Porc) 3x3.5cm sheet 1 each'. This section includes a 'Dose 1 each : Apply externally : Once' field, a '1200 Due' button, and a 'Dispense Location: Floor Stock' dropdown menu.
