

## MAR Administration Medication Dose

During administration, when a medication order is a bulk item (ex: ointments, pads, shampoo, lotion, etc) and there is no specified dose in the **Dose** field, just click **Accept** and move forward.

### Try It Out

1. A nurse has just applied a hazel-glycerin pad
2. In the administration window of the MAR, nurse will not indicate the **Dose** because it is a pad and EPIC does not calculate applications of items in bulk
3. Since there is no stop sign, it is okay to leave that field empty

Medication

✕ witch hazel-glycerin (TUCKS) pad : Topical : Every 4 hours as needed : irritation Rx
